PROFESSIONAL SUMMARY

Full-Stack Software Developer with 1 year and 8 months of experience building web applications using React.js, Python, Django REST Framework, and SQL. Experienced in developing CRM, ERP, employee monitoring, and AI-powered applications, with expertise in REST APIs, database design, multi-tenant architecture, and team collaboration.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, Kotlin, TypeScript (learning)
Front-End: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design, Redux/Context API, Vite, REST API Integration,
Back-End: Python, Django, Django REST Framework, Node.js, Express.js, RESTful API Development, WebSockets (Django Channels), JWT Authentication, Role-Based Access Control (RBAC), Multi-Tenant Architecture, Microservices Concepts
Databases: PostgreSQL, MySQL (basic), SQLite, MongoDB, Database Design, ORM (Django ORM), Query Optimization
Cloud & DevOps: AWS (EC2, S3), Docker (basic), Git, GitHub, GitHub Actions (basic CI/CD), Linux, Deployment & Release Management
Testing & Practices: Unit Testing, Postman, Code Reviews, Client Communication, Team Leadership, Agile/Scrum, SDLC

PROFESSIONAL EXPERIENCE

Orbitz IT Solution Feb 2026 – Present
Software Developer (Full-Stack) Chennai, India
Jan 2026 – Present

• CRM and ERP Development Developed core features across CRM and customized ERP platforms using React.js and Django REST Framework, including role-based access control (RBAC), tenant-level data isolation, inventory,finance, HR, payroll, and reporting workflows.
• Employee Monitoring Platform Contributed to a monitoring platform built with Python, Django Channels, and React, supporting real-time WebSocket streaming, employee activity analytics, forensic logs, security alerts, and data loss prevention (DLP).
• Full-Stack Client Solutions Independently developed and deployed 6+ client websites and platforms across marketing, e-commerce, and classifieds using React.js and Django REST Framework.
• AI Agent and Memory System Contributed to developing a local-first AI agent using Python, FastAPI, and React, with scoped long-term memory, LLM integration, reviewable memory extraction, and permission-controlled tool execution.

Sugi Infotech Jul 2024 – Jun 2025
Junior Software Developer Madurai, Tamil Nadu, India

• IsoTracker Development Developed and maintained the IsoTracker quality management platform serving 130+ companies, supporting document control, audits, and complaint management workflows using Python and Django.
• API and Database Optimization Built RESTful APIs with Django REST Framework and designed MySQL database schemas, achieving a 20% improvement in query performance through optimization.
• Frontend Development Implemented responsive interfaces using HTML5, CSS3, Bootstrap, and jQuery; integrated AJAX for dynamic updates, reducing page load times by 40%.
• Code Quality Performed debugging, maintained version control using Git and GitHub, and contributed to code reviews and unit testing to ensure code quality

PROJECTS

EventBooking Management System | Python, Django, Django REST Framework, MySQL, MongoDB

- Developed an event booking system with event management, secure authentication, and REST API integration.
- Implemented QR code ticket generation and validation to streamline booking and event entry verification.

Hot Food – Food Delivery Website | Python, Django, MySQL, HTML, CSS, Bootstrap, JavaScript

- Developed a responsive food delivery website with user authentication, product listings, shopping cart, and order processing.
- Integrated database operations for managing food products, customer details, and orders using HTML, CSS, and Bootstrap.

EDUCATION

Sethu Institute of Technology *Graduated-2024*
Bachelor of Engineering (B.E.) in Computer Science and Engineering (CGPA: 7.8/10) Madurai, Tamil Nadu, India
